Principles of Chromatography

	Colloidal gold immunochromatography	Fluorescence immunochromatography
Mark	Colloidal gold	Fluorescence
Detection principle	Detect line color intensity converted to digital signal	The detection line fluorescence intensity is converted into a digital signal

In Vitro Diagnostic Project

PMDT®9000 Immunofluorescence Analyzer

- · Meet primary testing need, 120 tests/h
- · Space saving
- · Convenient to use

PMDT®9100 Immunofluorescence Analyzer(Multichannel)

- · 12 testing tunnels, 200 tests/h
- · Various biomarkers tested simultaneously
- · Auto timing

Fluorescence Immunoassay Analyzer

Fluorescence Immunoassay Analyzer (IFA) is an analyzer that based on detection of fluorescence emitted during an immunoassay with antigen-antibody interaction.

Our Analyzer is designed to provide quantitative/qualitative test results by the examination of human samples with the following specific in vitro diagnostic test units:

Inflammation Markers

Tumor Markers

Nephrology

Diabetes

Cardiac Markers

Coagulation

Endocrinology

Fertility (Maternal & Children Healthcare)

Autoimmunity

Infectious Diseases, and etc..

Reading time: 15seconds

Our fluorescence immunoassay analyzer offers the advantages of high accuracy, strong stability and fast results.

Note: The first brand that develop in Vitamin D test, and the

Advantages

>More designed POCT:

- steady structure for reliable results
- auto alert to clean polluted cassettes
- 9'screen, manipulation friendly
- various ways of data exporting
- full IP of testing system and kits

>More accurate POCT:

- high-precision testing parts
- independent testing tunnels
- temperature & humidity auto-control
- auto QC & self-checking
- reacting time auto-control
- auto-saving data

>More efficient POCT:

- high-throughput for gargantuan testing needs
- testing cassettes auto-reading
- various testing samples available
- fitting in many emergency situations
- capable to connect printer directly (special model only)
- registered QC for all testing kits

>More intelligent POCT:

- registered QC for all testing kits
- real-time monitoring of every tunnels
- touchscreen instead of mouse and keyboard
- Al chip for data management

DIAGNOSIS ITEMS OF IMMUNOFLUORESCENCE PLATFORM

DIAGNOSIS ITEMS OF IMMUNOFLUORESCENCE PLATFORM

CATEGORY	PRODUCT NAME	FULL NAME	CLINICAL APPLICATION	CATEGORY	PRODUCT NAME	FULL NAME	CLINICAL APPLICATION
Cardiac	sST2/NT-proBNP	Soluble ST2/ N-Terminal Pro-Brain Natriuretic Peptide	Clinical diagnosis of heart failure	Thyroid	TSH	Thyroid stimulating hormone	Indicators for the diagnosis and treatment of hyperthyroidism and
	cTnl	Cardiac troponin I	Highly sensitive and specific marker of myocardial damage		Т3	Triiodothyronine	Indicators for the diagnosis of hyperthyroidism
	NT-proBNP	N-Terminal Pro-Brain Natriuretic Peptide	Clinical diagnosis of heart failure		T4	Thyroxine	Indicators for the diagnosis of hyperthyroidism
	BNP	Brainnatriureticpeptide	Clinical diagnosis of heart failure	Hormone	FSH	Follicle-stimulating hormone	Assist in assessing ovarian health
	Lp-PLA2	lipoprotein associated phospholipase A2	Marker of vascular inflammation and atherosclerosis		LH	Luteinizing hormone	Assist in determining pregnancy
	S100-β	S100-β protein	Marker of blood-brain barrier (BBB) permeability and central nervous		PRL	Prolactin	For pituitary microtumor, reproductive biology study
	CK-MB/cTnl	Creatine kinase-MB/cardiac troponin I	Highly sensitive and specific marker of myocardial damage		Cortisol	Human Cortisol	Adrenal cortical function diagnosis
	CK-MB	Creatine kinase-MB	Highly sensitive and specific marker of myocardial damage		FA	Folic acid	Prevention of fetal neural tube malformation, pregnant
	Myo	Myoglobin	Sensitive marker for heart or muscle injury		β-нсс	β-human chorionic gonadotropin	Assist in determining pregnancy
	ST2	Soluble growth stimulation expressed gene 2	Clinical diagnosis of heart failure		Т	Testosterone	Assist to evaluate the endocrine hormone situation
	CK- MB/cTnI/Myo	-	Highly sensitive and specific marker of myocardial damage		Prog	Progesterone	Diagnosis of pregnancy
	H-fabp	Heart-type fatty acid-binding protein	Clinical diagnosis of heart failure		AMH	Anti-mullerian hormone	Evaluation the fertility
Coagulation	D-Dimer	D-dimer	Diagnosis of coagulation		INHB	Inhibin B	Marker of remaining fertility and ovarian function
Inflammation	CRP	C-reactive protein	Evaluation of inflammation		E2	Estradiol	The main sex hormones for women
	SAA	Serum amyloid A protein	Evaluation of inflammation	Gastric	PGI/II	Pepsinogen I, Pepsinogen II	Diagnosis of gastric mucosa injury
	hs-CRP+CRP	The high-sensitivity C-reactive protein +C-reactive protein	Evaluation of inflammation		G17	Gastrin 17	Gastric acid secretion, gastric health indicators
	SAA/CRP		Virus infection	Cancer	PSA	Prostate specific antigen Prostate cancer	Assist in the diagnosis of prostate cancer
	PCT	Procalcitonin	Identification and diasnosis of bacterial infection, guiding the application of		AFP	AlPhafetoProtein	Marker of liver cancer serum
	IL-6	Interleukin- 6	Identification and diasnosis of inflammation and infection		CEA	Carcinoembryonic antigen	Assist in the diagnosis of colorectal cancer, pancreatic cancer, gastric cancer,
Health	N-MID	N-MID OsteocalcinFIA	Monitoring therapeutic treatments of Osteoporosis	Renal Function	MAU	Microalbumininurine	Risk evaluation of kidney disease
	Ferritin	Ferritin	Prediction of Iron deficiency anemia		NGAL	Neutrophil gelatinase associated lipocalin	Marker of acute renal injury
	25-OH-VD	25-Hydroxy Vitamin D	Indicator of osteoporosis (bone weakness) and rickets (bone	Sars cov 2	SARS-CoV-2 Neutralizing	SARS-CoV-2 Neutralizing Antibody	The evluation of vaccination
	VB12	Vitamin B12	Symptoms of vitamin B12 deficiency		SARS-CoV-2 Antigen	SARS-CoV-2 Antigen	covid-19 test
Diabetes	HbA1c	Hemoglobin A1C	The best indicator to monitior the control of blood glucose of the diabetics		SARS-Cov-2 IgM/IgG	SARS-Cov-2 IgM/IgG antibody	covid-19 test with Ab
